

Please do not allow individuals to control more of the broadcast airways than has already occurred. It is not right for one company to control stations all across the nation. At the present, there already is too much conformity among stations owned by Clear Channel for example, which limits its music playlist to certain artists and recording companies. Even worse, an ideological group may be able to control radio, TV and newspapers, thereby limiting free speech by presenting biased news and event coverage. This has already happened with some of the television networks which present opinion as news, and limit or simply do not present opposing views. Please follow your conscience, do the right thing and protect the public interest.
